Earn the fees that survive. Borrow against the same share.

Robinhood made Stock Tokens collateral on Morpho on 22 October, and collateral posted there earns nothing. Uptick is launching vaults that put the token to work as Uniswap liquidity, with a share you can borrow against. Stock Token pools trade while Nasdaq sleeps: 58% of their swaps land outside NYSE regular hours. We replayed 3,059,881 swaps to rank 17 tokens.

3

Open

PLTR, AAPL and GOOGL. Both replay halves kept money.

9

Reduced

Deposits capped at $25,000 per transaction when the weaker half is near break-even.

5

Closed

TSLA, CRCL, MSTR, GME, SPCX. Shut, with the written reason on each vault page.

12 vaults launch first, the 3 open and the 9 reduced. **Exit in kind is always open**: you can take your slice of both tokens out on any vault.
